Montebello Coupe

Recently, Australian catamaran builder Montebello introduced its new 12.5m Coupe for a Gold Coast client. The Coupe, powered by 500bhp IPS Volvos with a top speed of 70km/h, offers the client a low-profile boat that can explore the city as well as take off on coastal journeys,

The Coupe has been fitted out with a huge master cabin, taking up the full width of the boat with his-and-her cabin door entry, one for each hull.

The Coupe is also fitted with a full Simrad electronics package, fully air-conditioned and a modern galley with refrigerator and freezer.

Montebello will be launching two sailing catamarans later this year. The 12.5m Sailing Catamarans have four cabins with ensuite, and are fully air-conditioned.

Fitted with all the latest technology in 24v systems, 800amp battery banks and eco Genset, the Montebello 12.5m is ideal for the charter boat market, says Montebello.
